IDENTIFIERS *Elementary Secondary Education Act Title VII

ABSTRACT

Developed by the National Consortia for Bilingual Education, this list of tests representing 72 Title VII projects includes commercially published tests, tests developed by the projects themselves, and tests designed by other entities such as educational laboratories, school districts, and state agencies. Each test is described in terms of the project using the test, language of the project, grade range, test title, origin of the test, stated purposes, age level or grade, level of application, and language of test. It should be noted that "adequacy of measurement, usability, or appropriateness (of the tests) should not be inferred." Appendix A shows the commercial tests used in Title VII projects, their publishers, and the project users. Appendix B gives the addresses of test publishers. A related document is RC 005 308. (MJB)

TESTS IN USE IN TITLE VII

BILINGUAL EDUCATION PROJECTS

NATIONAL CONSORTIA FOR BILINGUAL EDUCATION

JOHN PLAKOS, Director

June, 1971

RC 005322

INTRODUCTION

The "Tests in Use in Title VII Bilingual Education Projects" developed by the National Consortia for Bilingual Education is an up-to-date list of tests in use as reported by evaluators of Title VII bilingual projects. Its purpose is to indicate the testing domain of Title VII projects and thereby provide a basis for project-evaluation guidance from a national point of view. The list includes commercially published tests, tests developed by the bilingual projects themselves, and tests designed by other entities, such as educational laboratories, school districts, and state agencies. Adequacy of measurement, usability, or appropriateness should not be inferred. Also, many of the tests are still under development and lack sufficient validity data. Caution should be exercised in using such tests.

The project evaluators were the source for the information listed under the column "Stated Purpose of Test" for those tests developed at the local project level, while the information for commercially developed tests was extracted from Buros, Sixth Mental Measurements Yearbook.
